An Internet Presence

Today's customers demand information at their fingertips. Having a company website is one of the easiest and most cost effective ways to make your information available when and where customers seek it.

A website and domain name enhance customer's experiences, whether it is through customized emails, an easy way to locate your contact information, or discovering a new product or service.

A web site is no longer a luxury. Your own place on the internet is beneficial to both you and your customers! Its easy to provide up-to-date information, and to create a feel that compliments your physical business.

More About Internet Packages

Business Building Blocks specializes in helping independent businesses create a professional image.

All web packages include several email addresses, the capability for mailing lists, space to put up a web site, the ability to check your email either on the web or by downloading into an email program such as Outlook Express or Netscape Mail. More advanced features include the ability to create your own online store or have interactive web pages that use databases to provide customized information. Sites are easily upgradeable, if you find that you need more space.

Is your information available?

We'll help you get your web site uploaded and answer any questions that might come up, either now or down the road. If you want a hand in creating one, please email or visit www.businessbuildingblocks.com for information.

If you are the do-it-yourself type, there is a complete control panel to allow you complete control of your web domain from looking at web statistics and web logs to setting up new email and ftp accounts. If that's not your cup of tea, let us handle it for you!

As an added bonus, if you refer someone else who signs up for our hosting services, you will get one month of **free hosing**!

Feature Explanation

Email: Number of addresses varies depending on account size. The small package has four and larger have up to 20. All accounts can be accessed through either your internet browser or through an email program such as Outlook Express or Netscape Mail.

Package Size: Pick a size that fits your needs. Small packages support email and a basic web page, larger sites can support more graphically intense or more advanced features. Start small, expand as necessary!

All web packages include support for Front-Page extensions, and email, email forwarding, a control panel, spam fighting and many other benefits.

Control Panel: Administer specific aspects of your website including visitor statistics, creating new email accounts, managing spam,

Bigger Benefits-For Packages 50MB & Above

Subdomains: Not just www.yourdomain.com, but products.yourdomain.com .

Databases: Use databases to support a customer mailing list, discussion forums, or interactive pages.

Optional scripts are available for things such as shopping cart technology, message boards, and chat.
